

# Life Science Vocab Set 1

**Across**

- 3. Kingdom made of simplest life forms, unicellular with NO nucleus
- 6. "building block" of living organisms
- 10. organism made of many cells
- 11. Maintaining stable internal conditions, like temperature and moisture

- 12. members of plant kingdom, multicellular, heterotrophs
- 13. Kingdom made of microscopic, unicellular organisms with a nucleus

**Down**

- 1. Using energy to carry out life functions
- 2. organism made of a single cell

- 4. Makes their own food, means "self-feeder"
- 5. Can't make their own food, means "other feeder"
- 7. Members of animal kingdom, all heterotrophs
- 8. Study of life
- 9. Kingdom made of mushroom, molds and yeasts, all heterotrophs
