

# Linear Equations

## Across

2. Which variable usually goes on the x axis?
4. Another word for rate of change
7. How would you describe a line with a greater slope than another line?
8. What is the name of this class?

## Word Bank

Slope formula  
steeper  
Table Graph Equation Words  
slope  
Zero

9. What test is used on a graph to see if it is a function?
10. What is the form that uses the slope and the y intercept?
12. What is the value of x at the y-intercept?
13. Name 4 ways to represent a function.

Math Modeling  
Slope intercept form  
x intercept  
y intercept

## Down

1. The point where the line crosses the x axis
3. What is the form that uses a point and the slope?
5. What do you use to find slope given two points?
6. The point where the line crosses the y axis
11. Which variable usually goes on the y axis?

Point slope form  
dependent  
independent  
Vertical line test
