# Linear Equations Matching

1. How do you find slope on a graph?
  2. What's the slope of a horizontal line?
  3. Where do you find the y-intercept in a table?
  4. What's another way to describe slope
  5. What's another way to describe y-intercept?
  6. What's the slope of a vertical line?
  7. How do I know if an equation is a function?
  8. What is slope-intercept form?
  9. What letter represents slope?
  10. What letter represents the y-intercept?
- A. Only one y value for each x
  - B.  $y=mx+b$
  - C. Zero
  - D. Rise over Run
  - E. m
  - F. Starting point
  - G. Where x equals 0
  - H. Undefined
  - I. Rate of change
  - J. b
