

Living Environment Experimentation

Across

- 3.** A universally accepted study, usually backed up by studies.
- 4.** "Normal Group" should be similar to experimental group but it gets the "placebo." Control
- 8.** Compares the results of an experiment between two or more groups. Controlled
- 9.** Variable that is being tested, plotted on x-axis.
- 10.** You test only variable at a time

- 11.** A conclusion based on observation or evidence.

Down

- 1.** What is seen or measured ...
- 2.** Group being tested and receiving "drug."
- 5.** An untested prediction, has both cause and effect. "If then statement."
- 6.** "fake" pill
- 7.** Variable that is being measured in an experiment.
