

Lymph Nodes

Across

7. A group of nodes found on the anterior part of the neck, in front of the sternocleidomastoid muscle

8. The series of superficial lymph nodes in the face that lie above the buccinator muscle

9. Located on the posterior base of the head & drains this part of the scalp

Down

1. Drains external ear, lacrimal gland, adjacent regions of scalp and face

2. Lymph nodes that lie near the surface of the neck

3. Drains the Submandibular nodes, 3rd molars, and the wall of the throat (includes the retropharyngeal nodes)

4. Any of the rounded masses of lymphoid tissue that are surrounded by a capsule of connective tissue, are distributed along the lymphatic vessels, and contain numerous lymphocytes which filter the flow of lymph passing through the node

5. Drains the Submental nodes and remaining teeth & may or may not include 3rd molars

6. Drain fluid from the mandibular incisors, tip of tongue, midline of lip, chin, and floor of the mouth

10. Lymph nodes found near the parotid gland in the immune system
