

MATH ROCKS

Across

- 6. Has a starting point and a ending point
- 8. All angles and sides have the same length and are equal
- 12. An angle that measures 180 degrees
- 13. No sides are equal
- 15. Triangle with a 90 degree angle
- 16. One angle has to be more than 90 degrees

17. less then 180 degrees but more than 90 degrees

18. Two sides are the same length

Down

- 1. Angle with the measure of 90 degrees
- 2. Has 2 arrows (start and finish)
- 3. Two angles sum together to make 90 degrees
- 4. When two pairs vertical angles have the same angle measure

5. The point when two rays meet

7. When two lines cross and make four angles

9. Starts from a point - 1 arrow

10. Angle less then 90 degrees

11. When two angles share a common side and a common vertex

14. When two arms meet and create a vertex
