

# MBA 506- Investment Analysis & Portfolio

## Across

**2.** The original cost of an asset, less the accumulated amount of any depreciation or amortization, less the accumulated amount of any asset impairments

**7.** Ratio that attempts to predict the future stock price movements based on recently observed trend data

**9.** A written agreement or contract between an issuer and the holder that requires the issuer to pay the holder

**10.** The purchase of goods that are not consumed today but are used in the future to create wealth

**12.** The difference between the lower par value and the higher issuing price

**13.** The process of allocating the cost of an intangible asset over a period of time.

**14.** The value of an asset at a specific date

## Down

**1.** The current value of a future sum of money or stream of cash flows given a specified rate of return

**3.** Ratio of weighing risk, expressed as variance, against expected return

**4.** A type of security that signifies ownership in a corporation and represents a claim on part of the corporation's assets and earnings

**5.** Reduction in the price of a product or service that is offered by the seller, in exchange for early payment by the buyer

**6.** Ratio that measures the volatility, or systematic risk, of a security or a portfolio in comparison to the entire market or a benchmark

**8.** The ratio for valuing a company that measures its current share price relative to its per-share earnings

**11.** Ratio that finds the portion of a company's profit allocated to each share of common stock
