

METABOLISM CROSSWORD

Across

- 4. Chemical reactions that breakdown large compounds to simpler ones
- 5. Energy in Anabolism
- 8. What does ATP stand for
- 9. Small molecules combining to form large molecules
- 10. Water is being added while molecules are splitting

Down

- 1. Chemical process needed for all living organisms
- 2. Energy in Catabolism
- 3. Example of Anabolism
- 6. Chemical reaction combining simple molecules to complex biomolecules
- 7. Energy transfer

Word Bank

- | | | |
|------------------------|-----------------------|------------|
| Carbohydrates | Released | Metabolism |
| Adenosine Triphosphate | Dehydration Synthesis | ATP |
| Hydrolysis | Catabolism | Required |
| Anabolism | | |
