# MacroMolecules

## Across

- 7. Large molecules are called what?
- 8. What is used by cells for energy
- 11. The study of carbon atoms
- 13. Macromolecule that function is contraction
- 14. The simplest compound that contain only carbon & hydrogen atoms
- 15. What kind of atom is Carbon?
- 16. What bond makes up a amino acid

- 17. Macromolecule that makes hormones
- 19. have less than the maximum number of hydrogens bonded to the carbons
- 20. Process called when you remove water to create a monomer

## Down

- 1. Macromolecule used for information
- 2. Example of polysaccharide in animals
- 3. A double sugar is called what?

- 4. Macromolecule function is for plant structure
- 5. Simple sugars are called what?
- 6. Solid at room temperature
- 9. What is the base for a steroid?
- 10. Proteins are monomers that make up what?
- 12. Process of cells breaking down macromolecules
- 18. It has the base uracil (U) instead of thymine (T)
