

Name: _____

Macromolecules

Across

- 4. Its monomer is nucleotides
- 5. a dark orange substance used to find carbohydrates
- 7. Separates monomers by adding water
- 10. means made up of carbon
- 11. Nucleic acids can be found in

13. the monomer for lipids

14. The substance used to find lipids in a lab

15. its monomer is amino acids

Down

1. Proteins help build

2. also called "Condensation Reaction"

3. Its monomer is monosaccharide

6. What word ends in ose

8. to repel or not mix with water

9. Used for insulation to keep your body warm

12. The building blocks of macromolecules
