

Macromolecules

Across

2. Basic structure of nucleic acids such as DNA
 5. A polymer with only two sugar molecules
 7. Other molecules can bond to form a polymer
 13. Carries genetic information
 15. A substance that is structurally consisting of units bonded together
 16. Also called fruit sugar
 18. A plant starch with unbranched glucose chains

19. Made of many sugar molecules

20. Present in RNA or DNA

Down

1. Table sugar
 3. Includes oil and butter, and is a fatty acid
 4. Also known as milk sugar
 6. Includes any class of sugar such as glucose
 8. Is used to do work

9. Contains hydrogen and nitrogen and is an organic compound

10. Found in sugars and starch.

11. Is a type of lipid. Described as colorless and liquid.

12. Contains a large number of atoms

14. Found in Muscles, hair, collagen, and is an amino acid

17. Is located in the body and is the main building block of fats.
