

# Managing Information And Change In A Connected World

**Across**

- 1. Pulse speed is measured according to the number of clock pulses.
- 4. is data that is organized to be meaningful and potentially useful.
- 8. Collection of raw, unorganized content in the form of words
- 12. Programs instructions and data reside in memory locations known as addresses
- 13. An online area, provided by an online service

- 14. Thin piece of silicon containing electrical circuitry
  - 15. A group of eight bits
  - 16. means retrieving an instruction or data from memory
  - 20. World Computing Network
- Down**
- 2. One billion hertz
  - 3. To fund and coordinate defense related scientific research.
  - 5. Carrying out the instructing.
  - 6. representing information using one and zeros.

- 7. Smallest unit of data
- 9. is equal to two ticks of the clock.
- 10. Internet navigation software
- 11. Interpreting or translating the instruction into a form the computer
- 17. A text, voice, or video message sent or received
- 18. Electrical device that accepts input (programs and data).
- 19. One billion bytes
