

Name: _____

Date: _____

Match it up!!!

- | | |
|--|-------------------------------|
| 1. Materials that change when their environment changes | A. CAM |
| 2. Materials that are new | B. Oscillating motion |
| 3. Fabrics that have a modern technology within them | C. Computer Aided Design |
| 4. Creating design ideas on the computer (Techsoft for example) | D. Technical textiles |
| 5. Manufacturing with a machine from a computer drawing | E. Modern Materials |
| 6. CAD | F. Just In Time (JIT) |
| 7. CAM | G. CAD |
| 8. When raw materials and components are ordered just in time to be used in production | H. Reciprocating |
| 9. Motion that goes forwards and backwards in an arc | I. Ergonomics |
| 10. Motion that goes forward and backward | J. Non-Finite |
| 11. Coal, Oil and gas are types of what energy | K. Anthropometrics |
| 12. Hydro, biomass, wind and solar are types of what energy | L. Computer Aided Manufacture |
| 13. The study of how people interact with products | M. Finite energy |
| 14. The measurements of people -which can be used in products | N. Smart materials |
