

# Math Cross Word

## Across

2. A number that is less than zero.  
 6. A shape with eight sides.  
 7. A result obtained by dividing one equality by another.  
 11. A line that intersects two or more times.  
 14. If the sum of two angles is 180 then they are (Blank).  
 16. The part of mathematics in which letters and other general symbols are used to represent numbers and quantities in formulae and equations.

17. The relation that holds between two values when they are different.  
 18. They are angles that where a common Ray vertex.  
 19. An angle that is 180.  
 20. If the sum of to angles is 90 then they are (Blank).

## Down

1. The distance of a number from the origin (Blank) value.  
 3. Are lines that join to form right angles.  
 4. An angle that equals 90.  
 5. An angle that is more then 90.

8. A number multiplied by itself is called what?  
 9. A (Blank) number is a value that represents a quantity along a line.  
 10. Angles that always have the same measure  
 12. What is an angle that less than 90 called?  
 13. If all of its sides have the same length and all of its sides have the same measure it is a (Blank).  
 15. An equation in which each term is ether a constant and (the first power of) a single variable.
