

Math Terms

Across

- 3. The relationship when each input has one output
- 6. Ordered pair
- 7. Shape after a transformation
- 10. Counting numbers
- 15. Numbers that can't be written as a fraction
- 16. When a shape gets bigger or smaller
- 17. All numbers are?
- 18. Steepness of a line
- 22. A turn

23. Shape before transformation

- 24. Where the line crosses the x axis
- 25. When the x goes up the y goes down

Down

- 1. Notation used to write numbers easier
- 2. Same angles different size
- 4. Where the line crosses the y-axis
- 5. Number multiplied by a shape in dilations
- 8. A slide

9. X values

- 11. When x goes up so does y
- 12. The line that goes through a pair of parallel lines
- 13. Can be written as a fraction
- 14. Counting numbers + 0
- 19. Exactly the same
- 20. Y values
- 21. Numbers on a number line
