

Math Terms

Across

- 2. 2 angles whose measures add up to 180°.
- 3. A line that intersects 2 other lines in different points.
- 7. A pair of angles formed by 2 intersecting lines.
- 12. A part of a line consisting of an endpoint and all points one side of that endpoint.
- 15. 2 numbers with a product of 1.
- 16. 2 angles whose measures have a sum of 90°.
- 17. Is any value or values that make an equation or inequality true.

19. Used to simplify by _____ like terms.

20. When 2 or more figures are the same shape and size.

Down

- 1. $P=2L+2W$
- 4. An angle with a measure of less than 90°.
- 5. A square plus B square =C square
- 6. Lines that intersect to form right angles.
- 8. Is the percent when something increases or decreases from it's original amount.

- 9. Is a number that when multiplied by itself equals the given number.
- 10. 2 angles that share a vertex & a side but no points in their interiors.
- 11. $Y=mx+b$
- 13. Solving equations that require more than 2 steps.
- 14. Is any equation whose graph is a line.
- 18. The union of 2 rays with a common end point.
