

# Math Vocabulary

## Across

1. the greatest whole number that is a factor of two or more numbers
5. a letter used to represent an unknown number
10. a statement that uses the symbols for less than or equal to, greater than or equal to, less than, or greater than to describe a relationship between two expressions
15. the set of all whole numbers and their additive inverse
17. a comparison of one amount with another
18. the result of adding two numbers or quantities
19. the point where the axes meet
20. the number or numbers that occur most often
22. the smallest multiple that two or more numbers share

## Down

23. the range of the quartiles
25. data that are grouped closely together
26. a number that is multiplied by another to yield a product
27. refers to the number of times a number is multiplied by itself
2. two numbers that are the same distance from zero on a number line but in different directions
3. the product of the number and any whole number greater than zero
4. an empty space or interval in a set of data
6. a comparison of two amounts with different units of measure
7. a part of an expression separated by addition or subtraction signs
8. a value that is much higher or much lower than the other values in a set of data

## Across

9. a mathematical combination of numbers, variables, and operations
11. a term that includes only a number
12. the answer in a division problem
13. a type of bar graph used to display numerical data that have been organized into equal intervals
14. the number by which a given number must be multiplied by to get a result of one
16. one of the four regions on a coordinate plane
21. a mathematical statement that two expressions are equal
24. the sum of the numbers of a data set divided by the number of data items
