Name: _____   Date: _____

Math Vocabulary

Across

2. A graph that uses line segments to show how data changes

8. A number greater than zero

9. to preform all indicated operations

10. A monomial or a sum or difference of monomials

12. a mathematical phrase that contains operations, numbers, and/or variables

16. acomparison of two quantities by division

17. A statement that compares two expressions

19. The horizontal axis in a coordinate plane

20. A polynomial with two terms

21. A quadrillateral with four right angles

Down

1. A symbol used to represent a quantity that can change

3. A literal equation that states a rule for a realationship among quantities

4. The product of the smallest positive number and the lowest power of each variable that divide evenly into each term

5. A graph made up of connected lines or curves

6. Two inequalities that are combined into one statement by the word and/or

7. A graph made up of unconnected points

11. The intersection of the X and Y axes in a coordinate plane

13. A ratio that compares two quantities measured in different units

14. A set of ordered pairs

15. A measure of the steepness of a line

18. The vertical axis in a coordinate plane
