

Math Vocabulary

Across

1. the distance the number is from zero on a number line **ABSOLUTE**
3. the vertical number line in a coordinate plane
8. fractions with different denominators **UNLIKE**
12. an additional amount of money charged on items that people buy **SELLING**
13. also known as gratuity, it is a small amount of money in return for a service
14. a measure of center in a set of numerical data
15. a unit rate where the denominator is one unit **UNIT**
17. each number in a sequence
19. a rate that is simplified so that it has a denominator of 1 unit **UNIT**

21. a parallelogram having four right angles and four congruent sides
22. the rate of change between any two points on a line
23. the difference between the greatest and least data value
25. having the same measure

Down

2. the horizontal number line in a coordinate plane
4. the amount the price of an item is increased above the price the store paid for the item
5. a symbol, usually a letter, used to represent a number in mathematical expressions or sentences
6. the number of cubic units needed to fill the space occupied by a solid

7. a ratio that compares the inaccuracy of an estimate to the actual amount **PERCENT**
9. the amount paid or earned for the use of money **SIMPLE**
10. an amount by which the price of an item is reduced
11. a ratio that compares the change in a quantity to the original amount **PERCENT OF**
16. a polygon having five sides
18. the number or numbers that appear most often in a set of data
20. the sum of the area of all the surfaces of a three-dimensional figure **SURFACE**
24. the sum of the data divided by the number of items in the data set
