

# Math & Grammar Test

**Across**

- 4. A word that is pronounced the same as another word but differs in meaning, and may differ in spelling
- 5. A shortened version of the written and spoken forms of a word, syllable, or word group, created by omission of internal letters and sounds. (shouldn't = should not)
- 7. A word that takes the place of a noun.
- 8. The answer to a multiplication problem
- 9. A quadrilateral with opposite sides parallel (and therefore opposite angles equal)

- 10. A word or phrase that means exactly or nearly the same as another word or phrase in the same language.

**Down**

- 1. The answer to a division problem
- 2. An angle that measures greater than 90 degree and less than 180 degree
- 3. Exactly equal in size and shape. Sides or segments have the exact same length. Angles have the exact same measure.
- 6. A word opposite in meaning to another
