

# Math/research

## Across

2. a triangle with 2 equal sides  
 4. all side are the same  
 7. two angles whose sum is 180 degrees  
 8. the point halfway from 2 points  
 9. part of a line with a fixed starting point but no end point  
 12. an angle that measures less than 90 degrees  
 13. length times width times height

## 14. used to describe opposite

16. connects the midpoints of 2 sides of a triangle  
 17. a conclusion based on observations  
 18. divides an angle into two equal parts  
 19. consist of two points and could make a line

## Down

1. the distance around a shape/adding side lengths  
 3. two straight lines that don't intersect

## 5. each of the pairs of opposite angles made by two intersecting lines

6. a conclusion based on proof/facts  
 10. two angles whose sum is 90 degrees  
 11. A conclusion based off incomplete information  
 15. used to show a specific spot on a graph  
 20. the term used when you add numbers and solve
