# Mean, Median, Mode, Range

1. Which of these is computed by adding all of the numbers in the data together and dividing by the number elements contained in the data set? A. Range
2. Which of data set is the difference between the largest value and smallest value contained in the data set? B. 4
3. Which of a data set is the element that occurs the most often. C. 8
4. Which of the data set is dependent on whether the number of elements in the data set is odd or even? D. 7
5. What is the median of 9,9,4,4,7,9? E. 5
6. What is the median of 2,3,9,2,9? F. 6.5
7. What is the mode of 4,9,3,6,6,4,4,5,5,4 G. 6
8. What is the range of 3,6,5,2,3,8,3,2,4 H. Median
9. What is the Median of 6,8,7,8,5,5,1,8 I. Mean
10. What is the median of 5,3,4,6,8,7,2 J. 3
11. What is the mode of 6,3,5,3,4,9,4,6 K. Mode
12. What is the mean of 9,9,4,4,7,9? L. 3,4,6
