

Measuring Electricity

Across

7. Any device put into a circuit to do work.
8. Electrons flowing point to point with different voltage
9. Measure of the rate of doing work
10. Introduces the concept of time to Electricity

Down

1. Property that slows the flow of electrons
2. A very small amount of electrical power
3. The amount of electric current flowing due to applied voltage
4. $V = I * R$
5. The pressure that pushes electrons in a circuit
6. Electric power is measured in
