

Medical Terminology for Healthcare - Chapter 5 Creative Study Assignment

Across

3. Double vision
 6. Ability of the eye to adjust focus on near object
 7. Involuntary, rapid, oscillating movement of the eyeball
 8. Colored circle; Colored part of eye located behind cornea that contracts & dilates to regulate light passing through pupil
 11. Blind spot in vision
 13. Drooping of the eyelid; usually caused by paralysis
 17. Laser-Assisted in Situ Keratomileusis
 18. Jelly-like mass filling the inner chamber between the lens and retina that gives bulk to the eye
 19. Innermost layer that perceives and transmits light to the optic nerve
 20. Misdirected eyelashes that rub on the conjunctiva or cornea
 22. Inflammation of the eyelid
 24. Inflammation of the cornea
 25. Extreme sensitivity to, and discomfort from, light
 26. Use of a tonometer to measure intraocular pressure, which is elevated in glaucoma
 27. Excision of a lacrimal sac
 29. Secretion of tears
 30. Opaque clouding of the lens causing decreased vision

Down

1. Excision of an eyeball
 2. Absence of the lens, usually after cataract extraction
 4. Impaired vision caused by old age or loss of accommodation
 5. Abnormal overflow of tears caused by blockage of the lacrimal duct

9. Rod-shaped cells within the retina that respond to dim light
 10. Inflammation of the sclera
 12. Mucous membrane that lines the eyelids and outer surface of the eyeball
 14. Use of an ophthalmoscope to view the interior of the eye
 15. Transparent structure behind the pupil that changes shape to help focus images on the retina
 16. Inflammation of the iris
 21. Use of intense cold to seal a hole or tear in the retina; used to treat retinal detachment
 23. Tough, fibrous, white outer coat extending from the cornea to the optic nerve
 28. Transparent anterior portion of the outer covering of the eye

Word Bank

Dacryocystectomy	Scotoma	Vitreous	Lacrimation	Nystagmus	Ophthalmoscopy
Lens	Accommodation	Iridectomy	Conjunctiva	Cornea	Blepharoptosis
Epiphora	Blepharitis	Sclera	Iritis	Cryopexy	Rods
Tonometry	Aphakia	Diplopia	Keratitis	Scleritis	Iris
Trichiasis	Photophobia	Presbyopia	Retina	LASIK	Cataract
