# Meiosis

## **Across**

- 2. How many daughter cells are made in meiosis?
- 7. Separation of homologous chromosomes during gamete formation?
- 9. A type of cell division that occurs during sexual reproduction?
- 10. How many stages are there during Meiosis?

- 11. How many chromosomes are in a cell used during meiosis?
- 12. Which cells are produced during Meiosis?
- 13. What cells are not used during meiosis?
- 14. The random arrangement and separation of chromosomes? (part 2)

## **Down**

- 1. What does meiosis increase?

- 3. What is half a chromosome called?
- 4. The exchange of genetic material between homologous chromosomes that result in recombinant chromosomes?
- 5. Does a sex cell have half a chromosome or a whole chromosomes?
- 6. The random arrangement and separation of chromosomes? (part 1)
- 8. How many times does a cell divide in meiosis?
