

Meiosis and Mitosis

Across

2. Mitosis is _____ cell division
 3. Type of Asexual Cell Division
 6. Asexual organisms have _____ chromosomes to the parent cell
 9. Chromosomes that are the same size and shape
 10. The sex chromosomes XX result in a _____

11. Cells with the complete chromosome number are known as

12. The sex chromosomes XY result in a _____
 13. The female gamete
 14. Sex Cells are known as
 15. The male gamete
 17. The union of specialized sex cells to maintain chromosome number
 18. Mitotic Division that the parent divides into two equal parts

Down

1. Mitotic Division where plants grow from part of the original
 4. Cells with half the chromosome number are known as
 5. Coiled strands of DNA
 7. The genetic material is found here in cells
 8. Meiosis is _____ cell division
 16. Type of Cell Division that results in sex cells
