

# Memory

## Across

2. Ability to recall information from long-term memory without effort.
6. Memory strategy involves grouping or organizing bits of information, such as our social security numbers.
8. Transforming information into a form that can be stored in memory.
10. Memory task in which a person must produce required information by searching memory.
11. Process of keeping or maintaining information in memory.

12. Ability to retain the image of a visual stimulus.
13. Frameworks of knowledge and assumption we have about people, objects, and events.
14. Process of encoding, storage, and retrieval of information.
15. Process of bringing to mind information that has been stored in memory.
16. Leading researcher on false memories.

## Down

1. Repeating information over and over again until it is no longer needed.

3. Relatively permanent storage with unlimited capacity.
4. Declarative memory stores facts, information, and personal life events; also called \_\_\_\_.
5. Memory system that holds about 7 items for less than 30 seconds without rehearsal.
7. Memory system holds information for period ranging from fraction of a second to about 2 seconds.
9. Oldest theory of forgetting, memories if not used, fade with time.
