

Memory

Across

2. The length of time information can be held in memory

5. A trigger of information that allows us to access memory

8. Grouping sets of digits or letters into chunks/units

10. The format in which information is stored in the various memory stores

11. A state of emotional and physical arousal

13. The attentional process in the working memory model that monitors incoming data, makes decisions and allocates slaves systems to tasks

15. A form of forgetting that occurs when we don't have the necessary cues to access memory

16. A long term memory store for personal events

17. A long term memory store for our knowledge of the world

Down

1. The component of the working memory model that processes visual and spatial information in a mental space

3. A question which suggests a certain answer, because of the phrasing

4. The model that is an explanation of how short term memory is organised and works

6. The memory store for each of our 5 senses

7. Our long term memory store of our knowledge of how to do things

9. The amount of information that can be held in a memory store

12. A type of interference that occurs when older memories disrupt the recall of newer memories

14. A type of interference that happens when newer memories disrupt the recall of older ones
