

# Metal extraction

## Across

3. The transferring and sharing of these sub-atomic particles, is why chemical reactions occur.
7. A substance made up of more than one type of atom chemically joined together
8. A type of atom found on the right hand side of the periodic table
10. When a substance tends to undergo chemical reactions

## Down

1. A substance made up of one type of atom
2. Basic building blocks of matter
4. A non-metal usually placed in the reactive series
5. The most reactive metal in the reactivity series
6. One of the least reactive metals
9. Type of atom found on the left hand side of the periodic table
