

Metals & Fossil Fuels

Across

- 2. Used to make Window frames and melt at 660*c
- 4. Ferrous metals are _____ and give little resistance to corrosion
- 9. Extracted from crude which includes all liquid hydrocarbons
- 10. A type of Ferrous metal that is generally used to make engineering materials

- 11. Metals that mostly contain iron
- 12. Heavier than other gas and is easily stored under modest pressure in its liquid form
- 13. Liquid fuel made of hydrocarbons and other liquid organic compounds

Down

- 1. Substance consist of Methane and Propane
- 3. Cutlery, Kitchen utensils and equipment and melt at 1400*c
- 5. Metals that has more resistance to corrosion
- 6. Used to make water pipes, electrical wires, decorative goods, etc
- 7. A solid Material typically malleable and Ductile
- 8. Black or brown organic rock
