

Name: _____

Microbiology and Asepsis

Across

- 2. any group of small bacteria
- 4. incapable of causing disease
- 6. relating to free oxygen
- 7. relating to absence of free oxygen
- 9. a microorganism
- 12. waste
- 13. insects that transmit disease
- 15. member of large unicellular microorganisms that lack organelles can cause disease
- 18. patients with contagious or infectious diseases are put in
- 19. capable of giving rise to a new individual without sexual fusion
- 20. spread from one person to another
- 21. disease prevalent over a whole country or the world

- 24. ability of an organism to resist infection

- 25. an antigenic poison
- 26. widespread occurrence of an infectious disease
- 28. objects that carry infections
- 30. able to be transmitted from one sufferer to another
- 31. a bacterium that can cause disease

Down

- 1. reduce number of microorganisms
- 3. disease regularly among particular people or area
- 5. chemical that destroys bacteria
- 8. disease originating in a hospital
- 10. being made by poisoning
- 11. process of making something bacteria free

- 14. substances that prevent growth of disease causing microorganisms
- 16. live in water
- 17. medical condition not caused by infectious agents
- 22. used for chemical reactions
- 23. state of being infected
- 27. fungus that grows in the form of unicellular filaments
- 29. plural form of fungus
