

Microscopy

Across

6. power of eyepiece lens x power of objective lens = _____
7. electron microscopes have _____ magnification and resolution than a light microscope
8. These are studied using _____ microscopes
9. electron microscopes only allow you to view what type of tissue

Down

1. light microscopes also allow us to see large _____
2. this microscope uses light and lenses
3. light microscopes let us see _____
4. this microscope has a higher magnification than light microscopes
5. image size / real size = _____
10. electron microscopes produce a _____ image
