

# Mitochondria, Chloroplast, & Peroxisomes

**Across**

3. are plant chloroplasts small or large organelles?

6. store starch in roots and tubers

7. An organelle found in the cells of plants that have an inner and outer membrane and contain their own DNA and ribosomes

9. contains DNA, ribosomes, and enzymes for part of photosynthesis

11. the color of chloroplasts

12. mitochondria and chloroplasts contain their own...

13. the outer membrane covers the organelle and contains it like...

14. The site of photosynthesis

**Down**

1. small vesicles that are similar to lysosomes

2. membranous sac that is site of photosynthesis

4. The powerhouse of the cell

5. Chromoplasts store pigments for fruits and...

8. coin shaped stack of thylakoids

10. the folds of mitochondrial inner membrane that provide increase of surface area
