

Mrs. Lane 3rd Science

Across

4. a system of sex organs Ex: testes
8. concerned with excretion (getting rid of)
9. where nutrients are absorbed into the blood stream
19. smallest living unit
20. a muscle you can move without thinking about it (automatically)
22. prevents you from getting sick
23. small and large.....
24. voluntary muscles attached to the skeleton
25. a system responsible for taking in oxygen and breathing out carbon dioxide

Down

1. breathes in oxygen and excretes carbon dioxide
2. connects almost all of the parts of the body to the brain (central nervous system) nerve fibers and tissues around the spine
3. an organ that pumps blood
5. the fluid waste from the kidneys
6. delivers nutrients and oxygen to the cells
7. The control center of the body
10. produces, stores, and eliminates urine
11. responsible for movement of the body

12. all of the bones and joints in your body
13. skin, hair, nails, and sweat glands
14. the network of nerve cells and fibers that transmit nerve impulses between parts of the body
15. produces hormones that regulate growth, metabolism, etc.
16. a single animal, plant, or life form
17. a set of connected things or parts forming a complex whole
18. where food is chemically broken down by acid to form a paste called Chyme
21. a vertebrae from the skull to the small of the back (provides support -backbone-)
