

Muscular System

Across

4. Cardiac muscle is a type of what muscle?
 5. Skeletal muscle is a form of what?
 11. Cytoplasm of the cell
 13. Membrane of the cell
 14. Skeletal muscles are located where?
 15. Smooth Muscle contraction is responsible for involuntary movements where?

16. Where do muscle contractions start?
 17. Most skeletal muscles are attached to what?
 18. Cardiac Muscles do what throughout the body?

Down

1. Smooth muscle forms the component of which of the 3 systems?
 2. What is cardiac muscle made of?
 3. Surrounds muscle fibers

6. Caused by the contraction of the muscle cells
 7. Cardiac muscle is only found where?
 8. Ability of muscle to stretch or get longer
 9. Skeletal muscles contribute to what?
 10. Muscles that contract to move the body
 12. Functional units of the skeletal muscle
