

Muscular System

Across

- 1. an expansive sheet of dense connective tissue that separate individual muscles
- 2. long cylinder contractible element within muscle fibers
- 5. contract and generate a wide range of tension and forces
- 11. ability to return back to normal state
- 14. a muscle that contracts without conscious control
- 15. found in thick filaments

- 16. What type of movement is cardiac muscle?
 - 17. raises eyebrows and wrinkles forehead
 - 18. the muscle tissue of the heart
- Down**
- 3. innermost connective tissue layer
 - 4. organ composed primarily of skeletal muscle tissues
 - 6. raises the lower jaw and is used in chewing

- 7. ability of muscle tissues to shorten and contract forcefully
- 8. What type of movement is skeletal muscle?
- 9. anchors all myofibrils to sarcolemma
- 10. smooth muscles are found in the hollow _____ organs
- 12. found in thin filament
- 13. anchors myosin to the z disk
