

Natural Gas Drilling

Across

2. Fredonia is where?
4. Stored and distributed under what type of pressure?
9. Emits carbon dioxide when burned is a _____ impact
13. what is the most abundant organic compound on Earth
14. Natural gas is considered _____ when there is a significant amount of other hydrocarbons.
15. Natural gas is considered _____ when it is almost purely methane?
17. Can be used to make what?

18. it is Lighter than what?
19. what forms underground, under intense conditions/
20. Where was the 27 foot deep well drilled?

Down

1. Burns quite efficiently is a _____ impact
3. it is safer than what?
5. As plants, animals, and microorganisms decompose, they are gradually covered by layers of what?
6. 1.2 million is how Natural gas industry what?

7. In 1821 they intentionally drilled for what?
8. The combination of compression and high temperature causes what to break down organic matter?
10. how many different theories to explain how fossil fuels are formed?
11. Methane is made of what?
12. Fracking has been linked to what?
16. Who drilled a 27 foot deep well?
