

Name: _____

Natural Selection

1. Recombinations of genetic material make an individual more _____.
 2. Source of genetic variation in natural selection?
 3. Source of mutations?
 4. Contains phosphate, sugar and 4 nitrogen bases.
 5. Eye color is an example of a _____.
 6. Humans have 23 pairs of these.
 7. Karyotypes can tell you about a person's _____.
 8. Selects against the less fit individuals.
 9. The blueprint of life.
 10. Changes in the genetic code.
 11. Chromosomes are made up of _____.
 12. A section of DNA that codes for a trait.
 13. Different forms of the same gene.
 14. A mutation that gives an individual an advantage during an environmental change.
- A. trait.
 - B. DNA.
 - C. Chromosomes.
 - D. Gender/chromosomal disorders.
 - E. Mutations.
 - F. DNA and proteins.
 - G. DNA
 - H. Adaption.
 - I. Alleles.
 - J. Chemical
 - K. Natural Selection.
 - L. Gene.
 - M. Fit.
 - N. Sequence of nitrogen bases
