

Name: _____

Nervous System-Overview

Across

1. Cells that get rid of pathogens in the CNS
5. Neurons involved in processing information
8. CSF is supplied by these cells
9. Another word for cell body
11. Kind of potential that moves
13. Star-shaped cells that link CNS to CVS

15. This division only gives voluntary responses

16. Nerves that report what is happening around you

17. What happens to the membrane when a stimulus arrives

Down

2. Rest and digest

3. Chemical that transmits the signal

4. You have no control over this division of the nervous system

6. Provides myelin in CNS

7. Fight or flight

10. Input centers of neuron

12. Nerves that send shivers down your spine

14. These cells speed up the nerve impulse
