# Nervous System

## Across

- 5. has no spine
- 8. potassium channels are open and some potassium leaks
- 9. space between neurons
- 10. sodium ions enter the neuron

11. most common in neuromuscular

12. cells made of myelin sheath

## Down

- 1. brought to CNS
- 2. space between schwann cells
- 3. signal hops from one node to the next

4. released into the synapse, between the neuron and the muscle

- 6. has a spine
- 7. going away from CNS
