

Name: _____

Date: _____

Period: _____

NERVOUS SYSTEM CROSSWORD

Across

4. Tissues of the nervous system

5. Nervous System vital organ

11. Nervous System that receives information from the environment and transmits commands to organs and glands

12. Type of neuron that transmits impulses from PNS to CNS

14. Main control center of the body, includes brain and spine.

16. Neurons are made up of three parts: Cell Body, Dendrites, and _____

Down

1. What is the gap between neurons called?

2. Chemical signals that carry messages across synapse

3. Provide structural support and protect neurons

6. Type of neuron that transmits impulse from CNS to muscles and glands

7. The _____ system interacts with and controls all the other organ systems in the body

8. Main communication between brain and the rest of the body

9. Sensory organ that uses electromagnetic receptors

10. Cells of the nervous system

13. Cluster of nerve cell bodies

15. Type of neuron that transmits impulses from sensory organ to CNS
