

Nonrhuematic carditis

Across

- 1. Not a cause of NC
- 3. Beta-adrenoblockers decrease..... At rest
- 5. In obstructive CMP..... Prohibited
- 10. Laboratory examination of carditis shows elevation of alpha and.... Globulin
- 11. In myocarditis during auscultation S1 is.....
- 13. In obstructive hypertrophic CMP, pressure gradient is less than
- 17. In late inborn carditid inflammation is
- 18. Predisposing factor of NC

20. CMP due to ventricular septum hypertrophy is called..... Phenomenon

- 21. The ejection fraction for a adolescent pt with inborn carditis is less than
- 22. In viral etiology , in acute phase of AVD..... Are contraindicated
- 23. In early inborn carditis inflammatory reaction is absent but..... Is present
- 24. In early inborn carditis.....is seen

Down

- 2. Is an indicator of severity and poor prognosis of inborn carditis
- 4. DCMP is frequent

6. Duration of chronic NC starts from..... months

- 7. Immune damage in NC is due to autoantibody and activated.....
- 8. In dilated CMP, during auscultation Is heard louder in vertical position
- 9. One of characteristic features of inborn carditis is..... Of ventricular septum
- 12. Appearance of DCMP
- 14. ECG of dilated CMP shows atypical deep.....
- 15. In treatment of HCMP, physical exertion is
- 16. Gold standard teat for HCMP
- 19. Used for heart failure
