

Northwestern Europe

Across

3. An amendment to the international treaty on climate change designed to reduce the amount of greenhouse gases emitted by specific countries
4. An industry engaged in agriculture on a large scale, sometimes including the manufacture and distribution of farm supplies
6. Low-lying area from which seawater has been drained to create new land
8. The mass murder of 6 million Jews by Germany's Nazi regime during WW2
13. The power struggle between the Soviet Union and the US after WW2
14. Fine, yellowish, brownish topsoil made up of particles of silt and clay, carried and deposited by the wind

15. The idea that society should be based on public ownership and communal control of property

16. Large bank of earth and stone that holds back water

17. A method for managing pollution in which a limit is placed on emissions and businesses or countries can buy and sell emissions allowances

Down

1. An economic system in which business leaders use profits to expand their companies

2. Beginning in the 1700s, the rapid major change in the economy with the introduction of power-driven machinery.

5. A large mass of ice, snow, and rock that slides down a mountain side

7. A strong westerly wind from the Alps that can bring cold air to southern France

9. Wet or dry airborne acids that fall to the ground

10. The granting of self-rule to local and regional authorities

11. A foreign laborer living and working temporarily in another country

12. A dry wind that blows from the leeward sides of mountains, sometimes melting snow and causing avalanches, term mainly used in Europe
