Observational Learning & Rule-Governed Behavior

Across

4. duplicating a novel behavior to achieve a specific goal
6. a verbal description of a contingency
7. behavior that has been generated through exposure to rules.
8. a classically conditioned emotional response resulting from seeing that emotional response exhibited by others
9. indicates the specific process by which a task is to be accomplished.
10. more-or-less instinctive or reflexive behavior triggered by the occurrence of the same behavior in another individual.

Down

1. close match to between what we say we are going to do and what we actually do at a later time.
2. verbal description of a contingency that we present to ourselves to influence our behavior.
3. directing attention to a particular place or object, making it more likely that the observer will approach that place or object
5. process whereby the behavior of a model is witnessed by an observer, and the observer's behavior is subsequently changed.
