

Ocean Movement Vocab

Across

5. Waves bending with the coast as they hit shallow water

8. Objects appear to move up and down but actually move in a circular motion.

9. Periodic disturbance as energy is moved.

10. The highest point of a wave

Down

1. Currents flowing parallel with the shore, forming sandbars

2. The wave hits the shoreline at depth of about $1/2$ the wave length

3. Water being pulled back to deep water due to gravity.

4. Water returning through channels between sandbars.

6. The lowest point between two crests.

7. The distance wind can blow across open water
