

Name: _____

Date: _____

Oceanography

Across

- 2. A series of waves that form when a large volume of ocean water is suddenly moved up or down
- 3. When water surface is replaced by cold, nutrient-rich water from the deep ocean
- 6. The time between the passage of two wave crests at a fixed point
- 8. A layer in a body of water in which water temperature drops with increased depth faster than it does in other layers

- 9. The lowest point of a wave

- 10. Waves that carry energy through matter, such as water

Down

- 1. the deflection of moving objects from a straight path due to Earth's rotation
- 4. Any disturbance that transfers energy through matter or empty space
- 5. The distance between two adjacent wave crests or wave troughs
- 7. The highest point of a wave
