

# Oceanography!

## Across

5. live in ocean, spawn in fresh water  
 7. able to tolerate only a narrow range of salinity  
 10. tolerant of temperature changes  
 11. the tidal mouth of a large river, where the tide meets the stream  
 12. tolerate of salinity changes  
 14. Brings warm water north, Feeds Hurricanes and Brings Nutrients  
 15. live in ocean, spawn in low salinity ocean

18. can control the loss or gain of water

19. a river or stream flowing into a larger river or lake

20. takes place when animals release their eggs and sperm into the water

## Down

1. live in freshwater, spawn in ocean

2. protective coloration of some animals in which parts normally in shadow are light and those exposed to the sky are dark

3. can not control the loss or gain of water

4. high pressure system found in the Atlantic Ocean

6. feeding by filtering out plankton or nutrients suspended in the water

8. able to tolerate only a small range of temperature

9. short lived, formed since the last ice age

13. an area or ridge of land that separates waters flowing to different rivers, basins, or seas

16. a warm ocean current of the northern Atlantic Ocean off eastern North America

17. not a permanent resident
