

Oceans

Across

- 2. On what part of the ocean floor do most organisms live?
- 6. The daily rise and fall of large bodies of water due to the moon's gravity
- 7. Underwater volcanos
- 10. deepest known ocean trench
- 12. What warm, strong current runs along the East coast and carries warm water to Europe?

- 13. Increases salinity in the ocean
 - 14. This helps phytoplankton by bringing up nutrients from the ocean floor
- Down**
- 1. Organisms that break down dead organisms
 - 3. As depth increases, this decreases
 - 4. The primary producers in the ocean

- 5. The property of matter that describes how tightly packed its molecules are
- 8. The amount of salt dissolved in ocean water
- 9. Energy that travels across the surface of large bodies of water
- 11. Lowers salinity
