

Organising an Ecosystem

Across

- 1. A group of microorganisms that break down waste
- 9. The evaporation of water from a plant
- 11. The hunter
- 13. Plants and algae are examples of this
- 14. Eat only plant material

15. Maggots, worms and beetles that start the decay process

16. Adding new material

Down

- 2. The process by which plants make glucose
- 3. Primary consumers are eaten by...
- 4. Rain, hail and snow are examples of this

- 5. Animals that eat producers
- 6. AKA The Water Cycle
- 7. Eat only animal material
- 8. Water turning from liquid to vapour
- 10. Something that is hunted
- 12. Eats both plants and animals
