

Organisms unit

Across

- 3. Living and once living parts of an ecosystem
- 4. nonliving parts of an ecosystem
- 6. Living organisms depend on their environment and compete for resources
- 11. the study of how organisms interact with the environment
- 12. which is a producer? rabbit , cow , grass , mouse
- 13. There are _____ domains
- 14. The second laragest grouping in organism classification

- 15. All the members of a species living in an area
 - 19. a herd of elephants is consider a _____
 - 20. There are _____ kingdoms
- Down**
- 1. Arrows in a food chain always point in the direction energy is _____
 - 2. Which is n biotic factor? air , feather , soil, oxygen
 - 5. AN _____ is a;l the living and nonliving populations in an area
 - 7. arrangement of several overlapping food chains of an ecosystem

- 8. path of food energy from the Sun to the producer
- 9. largest grouping in the classification of organisms
- 10. all the populations sharing a specific area
- 16. This is a producer
- 17. food chain uses _____ to show the direction of energy movement
- 18. Organisms get the energy they need from _____
